Color, cut the dotted line and fold on the thin black lines. Glue where it says to and assemble the structure. Now you have a building for your car to race around!

April Innovators LAB powered by Cox Communications

Cox Communication's High Speed Racer depicts how packets of information blast through Cox’s Gigablast fiber optic network from one point to the other! Cox is committed to keeping San Diegans and our community connected through these unprecedented times, and is proud to partner with the Museum to educate families about high-speed connections.
