**art**

Design your own car in *Desert Derby* and draw a reservoir, a place for storing water, in the center on the road.

What is all this water for? Why do you think it’s important to have a reservoir?

**play**

Once the cars are decorated, cut them out and drive them around the road! Play with friends or family members.

*Desert Derby*, 2015 - Roman De Salvo

*Desert Derby* is a landscape of reservoirs and roads inspired by Southern California’s true nature as an engineered phenomenon. Its natural water supply can support 2 million people, but over 23 million people can live here because of an aqueduct, a 700-mile-long pipe that delivers water from Northern to Southern California.
