

How to Make a Leporello Book

A Leporello is made up of printed material folded into an accordion style. Make your own Leporello book and tell your story!

Materials:

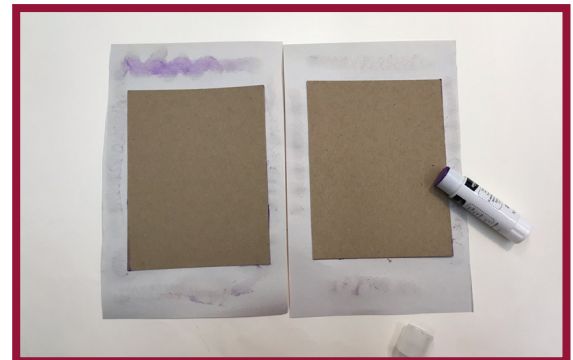

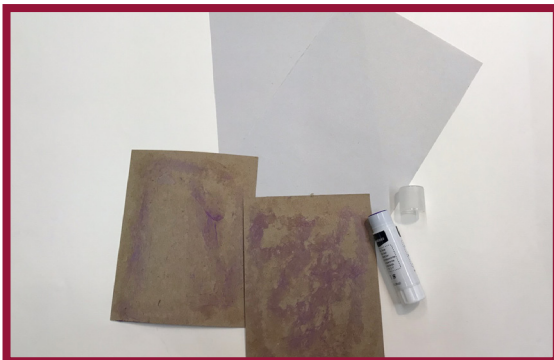

- 2 Cardboard pieces
- 2 Half sheets of newsprint
- 3 Sheets of multimedia paper (cut to size)
- Glue stick
- Scissors
- Markers

1

Create Your Covers Part 1:

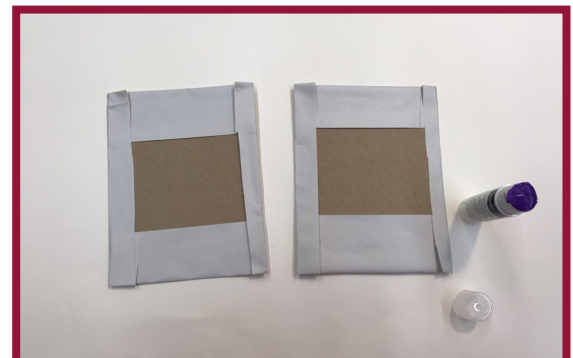

Take a piece of cardboard and cover one side with glue. Then place the cardboard (glue side down) onto the middle of a half sheet of newsprint. Repeat this for the second piece of cardboard and half sheet of newsprint.

2

Create Your Covers Part 2:

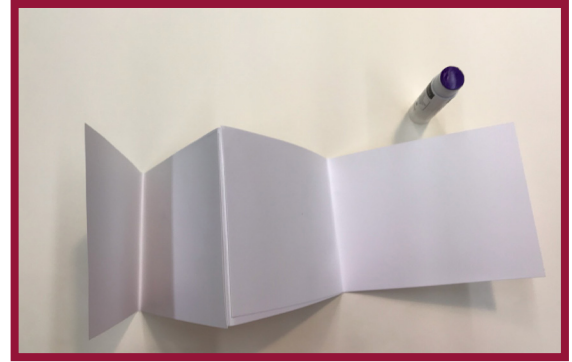

Cover the remaining areas of newsprint with glue. Then fold down all sides onto the cardboard. Do this for both pieces.

Make an Accordion Fold:

Next, use the 3 sheets of multimedia paper to create an accordion fold. Fold each sheet in half then glue the inside half to another sheet until you create an M or W shape. The folded corner of one sheet should be touching the edge of the next sheet.

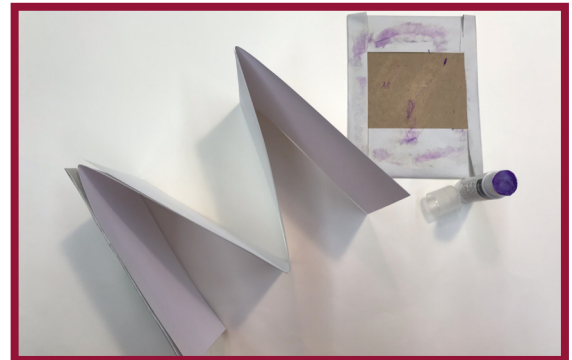

3

Attach Your Covers:

After you've created an accordion fold, glue the two covers onto the ends of the accordion. Make sure to glue the sides with the folded corners facing down.

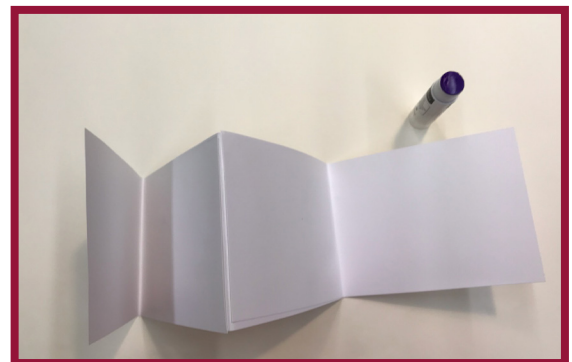

4

Design Your Story:

Get creative and draw or write your story on the Leporello pages! Then share your story with others.
